

November 20, 1975

Dear Bob -

You may recall ~~ahht~~ at the Organization Meeting held in June I was directed to contact the E. T. Dayton agency with reference to an up to date appraisal of the value of the East Hampton Visiting Nurse Association building. Copy of the result is enclosed.

At a meeting of the Board of Directors held yesterday the letter was read and the question raised as to whether the increase in coverage would be practical or was necessary.

The feeling was that if the building did burn would there be a need for it to be replaced in order to provide the services it now provides - in view of the huge Federal program of providing recreation areas all over creation.

The Board was of the opinion that the increase in coverage would not be practical or necessary - but - asked that I contact you for your opinion.

I know how busy you are and felt that rather than contact you by phone it would be better to give you the background so that you could take your time with the question.

Sincerely,
