Amagansett, N. Y.,

May 21, 1911.

Dear Mom and Pop,

I received your long-awaited-for letter yesterday, and was glad to hear from you, although you never said a single word about how you were, etc. I was very sorry to hear that you had a letter from Dr. Cronk. Why did he write, did you write to him? I don't see why I have got to use those horrid drops. My eyes are much better without them. They

run so when I use the drops, and besides, I cannot see as well. then. Nevertheless, I put them in my eyes yesterday, but very reluctantly.

Monday 12:55 - p.m.

I will write some more now, during my noon hour. Irene came for me to go out for a walk yesterday while I was out in the hammock writing. We walked through the woods. We picked some wild apple blossoms, ferns, wild honeysuckle, dog-wood and a few crowfoot flowers. Now I will leave it for you to imagine whether we had a good time or not.

Anyway, I did not get home until about six o'clock. Then I got supper ~~and~~ for Grandma and me and then went to church. We had a new minister yesterday, as Mr. Leavitt is away. I overslept yesterday morning so that I did not get to church, but it was enough to listen to him in the evening. I went to Sunday School and what did I get for going? A class to teach, and not only for yesterday, but as long as I stay there. It is Mrs. G. B.

Edwards' class of girls of about 12 yrs. Mr. Gosman said that he was very sorry to lose me from his class but I could do more good there. Now I guess I will have to study my lesson whether I want to or not.

I have just been down to White's to get a pair of smoked glasses. Won't I look swell? Ha-ha! But the light certainly hurts my eyes.

Mr. Lyman Babcock is going to take all the girls sailing Decoration Day. They are going to Greenport, and each is to take something. I have

to take oranges if I go. No boys are invited, but Clyde is going to run the engine for Lyman. I imagine we will have a nice time if the weather is all right.

Well, the last gong has rung and the students have numbered (roll-call) and the classes are at work, so I think I will look over my music and my biology for the next 40 min. in preparation for my ^{next} two classes.

I am studying hard

(My brain)

May 30 - Decoration Day.

I am not going on the sail
as they are going out in the ocean
fishing and I was afraid I might
be seasick out there. I was thinking
of going down to Montauk today
with Irene. We were going to see
Aunt Essie & Irene's brother, but
we are going down to ~~the~~ see the
sports at Sag Harbor instead.
I am already now to go on the
9:40.

Uncle David was not quite as

well last night, have not heard
this morning. Aunt Rae wanted
me to ask you if you would
not send him some oysters.
The doctor said he might have
oyster broth.

I have not time to write
any more, so good by.

Love & kisses

Anna
